

International equity markets continued to rise in the third quarter, returning 6.25% as measured by the MSCI ACWI ex USA Net Index, as low interest rates and unprecedented levels of fiscal stimulus have dampened investor's concerns over economic fallout from continued global COVID-19 cases and a possible resurgence of infections. In this environment, the SGA International ACWI ex-U.S. Equity strategy underperformed the benchmark.

The underperformance was a result of negative stock selection, primarily driven by the modestly negative performance of the SGA Alpha Model during the quarter. Within the Model, the Growth, and especially Valuation, categories drove the underperformance. The Sentiment category contributed while the Quality category was flat. Notably, Quality performed well among the emerging market segment, but underperformed among developed equities. Interaction between categories also contributed, but not enough to offset the underperformance in the other areas of the Model.

From a sector perspective, stock selection within sectors was the primary driver of underperformance. Selection was strongest in Health Care and Energy, while Industrials and Information Technology were areas of negative selection. In Health Care, Hoya benefitted from increased demand in its semiconductor segment along with improving eyeglass lens sales. Renewable Diesel producer Neste, contributed in Energy as demand for its alternative fuel remained robust. In Industrials, Central Japan Railway detracted due to lowered demand for passenger rail transportation. In Information Technology, smartphone equipment supplier LG Innotek declined over uncertainty on the next iPhone release.

From a country standpoint, selection within countries drove underperformance. Selection was strongest in India and the U.K., while China, Germany, and Sweden were areas of weaker selection. Postal Savings Bank of China and reinsurer Hannover Rueck detracted in China and Germany, respectively, as both companies reported weaker than expected results during the quarter. In Sweden, oil producer Lundin Energy declined as long-term oil price expectations fell. In India, Dr. Reddy's Laboratories was a top contributor after it won a key settlement over production of generic drug Revlimid. 3i Group contributed in the U.K. as its private equity portfolio company, discount retailer Action, has continued to benefit from the stay-at-home environment.

Inception to Date Annual Composite Performance

	2015**	2016	2017	2018	2019	2020 YTD

*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA International ACWI ex-U.S. Equity representative account as of the date noted. These holdings, sectors, country, and regional weights are subject to change without notice. Individual account data may vary. This information is supplemental to the Annual Disclosure Presentation.

The MSCI ACWI ex USA Index (Net) is free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. The MSCI ACWI ex USA Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

SGA INTERNATIONAL ACWI EX-U.S. EQUITY ANNUAL DISCLOSURE PRESENTATION

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

*Performance represents a non-annualized partial period return beginning on June 30, 2015.

**The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

SGA International ACWI ex-U.S. Equity Composite includes all discretionary, investment restricted, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international large cap securities. The minimum account size for this composite is \$100 thousand. For comparison purposes, the composite is compared to MSCI ACWI ex USA Net Index. The International ACWI ex-U.S. Equity Composite was created June 30, 2015. Prior to December 31, 2016, the International ACWI ex-U.S. Equity Composite was known as the International Large Cap Core Equity MSCI All Country World ex-U.S. Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through December 31, 2019. The verification report(s) is/are available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

SGA is an independently registered investment advisor. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI ACWI ex USA Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fees performance was calculated using the highest applicable annual management fee of 0.85% applied monthly effective October 1, 2017. Prior to October 1, 2017, net of fees performance was calculated using the highest applicable annual management fee of 1.00% applied monthly.

The annual composite dispersion presented is an asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

Beginning July 1, 2019, the composite policy requires the temporary removal of any portfolio due to a client-initiated significant cash inflow or outflow, excluding securities received or delivered in kind when the cash inflow or outflow represented 10% or greater of the portfolio assets. Additional information regarding the treatment of significant cash flows is available upon request.

Past performance is not indicative of future results.

Maximum fee is 0.85%; actual investment advisory fees incurred by clients may vary.
