

Record low interest rates and unprecedented levels of fiscal stimulus coupled with improving economic indicators and less restrictive lockdowns extended global equity market performance in the third quarter. Following a sustained rally in July and August, markets retreated in September with international stocks, as measured by the MSCI EAFE Net Index, rising 4.80% in the third quarter. In this environment, the International ADR Equity strategy outperformed the benchmark.

The SGA Alpha Model had negative performance for the quarter among non-U.S. large cap developed equities. Within the Model, several trends that persisted over the past year reversed during the quarter. In particular, both the Growth and Sentiment categories, which were strong contributors earlier in the year, detracted during the quarter. Additionally, after underperforming earlier in the year, Valuation was the top performing category in the quarter providing an especially strong contribution in September. The Quality category continued to underperform.

Stock selection was positive in Consumer Discretionary and Energy, partially offset by negative selection in Industrials and Financials. In Industrials, negative contributors included RELX, Alfa Laval, and Central Japan Railway, which fell as Shinkansen ridership continued to lag pre-COVID-19 levels. Larger detractors in the Financial sector included BNP Paribas, Shinsei Bank, and reinsurer Hannover Rueck, which declined due to COVID-19 charges in its Property & Casualty division. In Energy, oil refiner Neste rose as renewable diesel demand remains robust. In Consumer Discretionary, companies with online service offerings were positive contributors including Alibaba Group Holding and Zozo.

Stock selection was positive in the U.K. and Ireland, partially offset by negative selection in Japan and Austria. Austrian oil company OMV declined as the outlook remains challenging for downstream oil companies. In Japan, pharmaceutical firm Shionogi reported weak quarterly results. Despite overall negative selection in Japan, companies benefitting from the stay-at-home environment including Sony and Nintendo were positive contributors. Trading company Itochu also advanced with resilient performance in its textiles and iron ore businesses. In the U.K., top contributors included online gaming company GVC Holdings and Unilever. Ireland-based box maker Smurfit Kappa Group rose on rising e-commerce demand.

*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA International ADR Equity representative account as of the date noted. These holdings, sectors, country, and regional weights are subject to change without notice. Individual account data may vary. This information is supplemental to the Annual Disclosure Presentation.

The MSCI EAFE (Europe, Australasia, Far East) Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. The MSCI EAFE Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

*Performance represents a non-annualized partial period return beginning on June 30, 2006.

**Pure gross returns are shown as supplemental information and for bundled fee accounts are stated gross of all fees and transaction costs.

***The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

SGA International ADR Equity Composite includes all discretionary, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international large cap ADRs. The minimum account size for this composite is \$100 thousand. Prior to December 31, 2016, accounts in the composite held at least 75 securities. As of January 1, 2017, minimum number of securities is no longer required for accounts to be included in the composite. Beginning January 1, 2017, accounts in this composite may contain client imposed investment restrictions. For comparison purposes, the composite is compared to the MSCI EAFE Net Index. The International ADR Equity Composite was created June 30, 2006. Prior to December 31, 2016, the International ADR Equity Composite was known as the International Large Cap Core ADR Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through December 31, 2019. The verification report(s) is/are available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

SGA is an independently registered investment advisor. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI EAFE Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. This composite consists of both bundled fee (or wrap fee) and non-bundled fee accounts. Between July 1, 2006 and August 31, 2007, the composite included only non-bundled fee accounts. From December 1, 2009 through December 31, 2013, 100% of the composite consisted of bundled fee (or wrap fee) accounts. For bundled fee accounts, these accounts pay a fee based on a percentage of assets under management, which besides brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial services. Returns are presented gross and net of fees and include the reinvestment of all income. Gross returns are shown as supplemental information and for bundled fee accounts are stated gross of all fees and transaction costs; net returns are reduced by management fees and transaction costs. Beginning January 1, 2017, less than 1% of the composite consisted of non-fee paying accounts. Net of fees performance was calculated using the highest applicable annual management fee of 0.75% applied monthly effective October 1, 2017. Prior to October 1, 2017, net of fees performance was calculated using the highest applicable annual management fee of 0.95% applied monthly effective September 1, 2007. Prior to September 1, 2007, net of fees performance was calculated using the highest applicable annual management fee of 0.50% applied monthly.

The annual composite dispersion presented is an asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

Past performance is not indicative of future results.

Maximum management fee is 0.75%; actual investment advisory fees incurred by clients may vary.

Please note: Previous versions of this product sheet contained related performance for periods November 30, 2005 to June 30, 2006. Performance shown prior to June 30, 2006 represents the International Equity Composite, which was a similar strategy to the International ADR Equity Composite but utilizes ordinary foreign shares instead of ADRs. The revised figures are included here. Additionally, all periods presented prior to December 1, 2018 include bundled fee portfolios. On December 1, 2018, the bundled fee portfolios were removed from this composite to the International ADR Wrap Equity composite.

Please contact SGA if you have questions.
