

Following gains in July and August, global equity markets retreated in September. A regulatory clampdown in China coupled with supply chain bottlenecks that have prolonged elevated inflation levels prompted a tempered outlook on economic growth. Global stocks, as measured by the MSCI World Net Index, returned -0.01% in the third quarter. In this environment, the Global Equity strategy outperformed the benchmark.

The SGA Alpha Model had positive performance for the quarter among global developed large cap equities. Within the Model, the Quality, Sentiment, and Growth categories made positive contributions while the Valuation category underperformed. The Quality category performed best as all five factors within the category had strong positive performance during the quarter.

The outperformance was mainly due to stock selection within sector. Stock selection was positive in Consumer Staples and Financials, partially offset by negative selection in Industrials and Consumer Discretionary. In Consumer Staples, Albertsons announced management changes, which was well received by the market, while Koninklijke Ahold Delhaize also contributed. In Financials, Western Alliance gained as economic activity rebounded and overall yields shifted higher. In Industrials, Timken missed consensus estimates and reported supply chain challenges, while 3M and Acuity Brands also underperformed. In Consumer Discretionary, LG Electronics detracted over concerns of peaking demand in appliances.

Stock selection was positive in the U.S., the Netherlands, Germany, and Canada, partially offset by negative selection in Denmark. In the U.S., Albertsons, Western Alliance, and Hill-Rom were top contributors. In the Netherlands, Koninklijke Ahold Delhaize contributed as demand returned to food retailing essentials and Wolters Kluwer reported a rebound in business. In Germany, Merck KGaA and Covestro outperformed. In Canada, Constellation Software and CI Financial Corp contributed positively. In Denmark, GN Store Nord gave cautious guidance for its hearing aid business and beverage firm Carlsberg cited uneven recoveries in Asia and Europe.

Inception to Date – Annual Composite Performance

	2013**	2014	2015	2016	2017	2018	2019	2020	2021 YTD

*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA Global Equity representative account as of the date noted. These holdings, sectors, country, and regional weights are subject to change without notice. Individual account data may vary. This information is supplemental to the Annual Disclosure Presentation.

The MSCI World Index (Net) is free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index (Net) returns include reinvestment of dividends and other earnings, and is not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

*Performance represents a non-annualized partial period return beginning on October 31, 2013.

**The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

SGA Global Equity Composite includes all discretionary, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in a combination of U.S. and international large cap securities. The minimum account size for this composite is \$100 thousand. For comparison purposes, the composite is compared to the MSCI World Net Index. The Global Equity Composite was created October 31, 2013. Prior to December 31, 2016, the Global Equity Composite was known as the Global Large Cap Core Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through June 30, 2020. The verification report(s) is/are available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

SGA is an independently registered investment advisor. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI World Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fees performance was calculated using the highest applicable annual management fee of 0.75% applied monthly effective October 1, 2017. Prior to October 1, 2017, net of fees performance was calculated using the highest applicable annual management fee of 1.00% applied monthly.

The annual composite dispersion presented is an asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

From October 31, 2013 to January 1, 2014, composite policy included two scenarios that require the temporary removal of any portfolio due to a client initiated significant cash inflow or outflow: 1) When the cash inflow or outflow represents from over 5% to 10% of portfolio assets and it takes longer than five trading days to reduce cash levels to less than 5%, and 2) When the cash inflow or outflow represents more than 10% of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite at the beginning of the month after the cash level in the portfolio is reduced to less than 5%. Beginning July 1, 2019, the composite policy requires the temporary removal of any portfolio due to a client-initiated significant cash inflow or outflow, excluding securities received or delivered in kind when the cash inflow or outflow represented 10% or greater of the portfolio assets. Additional information regarding the treatment of significant cash flows is available upon request.

Past performance is not indicative of future results.

Maximum fee is 0.75%; actual investment advisory fees incurred by clients may vary.
