

## SGA International All Cap Equity

In the third quarter, international equities, as represented by the MSCI World ex USA IMI Net Index, returned -0.45%, as volatility increased and markets discounted a mixed outlook on economic growth. In this environment, the International All Cap Equity strategy outperformed the benchmark.

The SGA Alpha Model had positive performance for the quarter among non-U.S. developed equities. Within the Model, the Growth category performed best, led by SGA's Fundamental Growth Consistency factor for the second quarter in a row. The Sentiment and Valuation categories also contributed while the Quality category modestly detracted. Notably, the Valuation category had positive performance in September after underperforming the first two months of the quarter.

From a sector perspective, outperformance was driven by positive stock selection in Communication Services and Consumer Staples, while selection was weaker in Industrials and Consumer Discretionary. In Consumer Staples, grocery store operator Life Corp. rose as margins staged a significant recovery from pandemic lows. E-commerce solutions provider USEN-NEXT was a top performer in Communication Services following strong quarterly results. In Industrials, rising input cost inflation concerns led to weaker performance from more capital-intensive holdings Signify and Valmet. In Consumer Discretionary, spandex supplier Hyosung TNC declined as the outlook for spandex margins came under pressure from increasing industry capacity expansion.

From a country standpoint, stock selection and country allocation both contributed to the outperformance. Selection was strong in Japan and Ireland, partially offset by weak selection in Australia and Finland. Positive selection in Japan was driven by companies benefitting from accelerated digital transformation such as USEN-Next and IT consulting firm BayCurrent Consulting. In Ireland, clinical research firm ICON Plc benefitted from a robust demand environment for clinical trial services. Detractors in Australia included Rio Tinto, which declined in step with iron ore prices, and medical equipment supplier Ansell after reporting weak guidance. In Finland, previously mentioned Valmet was the primary driver of negative selection.

### Ten Calendar Years – Annual Composite Performance

\*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA International All Cap Equity representative account as of the date noted. These holdings, sectors, country, and regional weights are subject to change without notice. Individual account data may vary. This information is supplemental to the Annual Disclosure Presentation.

The MSCI World ex USA IMI Index (Net) is free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. The MSCI World ex USA IMI Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

\*Performance represents a non-annualized partial period return beginning on April 30, 2008.

\*\*The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

**SGA International All Cap Equity Composite** includes all discretionary, fee paying, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international all cap securities. The minimum account size for this composite is \$100 thousand. Beginning January 1, 2017, accounts in this composite may contain client imposed investment restrictions. For comparison purposes, the composite is compared to the MSCI World Ex-U.S. IMI Net Index. The International All Cap Equity Composite was created April 30, 2008. Prior to December 31, 2016, the International All Cap Equity Composite was known as the International All Cap Core MSCI World ex-U.S. IMI Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through June 30, 2020. The verification report(s) is/are available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

SGA is an independently registered investment advisor. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI World ex-U.S. IMI Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fees performance was calculated using the highest applicable annual management fee of 0.85% applied monthly effective October 1, 2017. Prior to October 1, 2017, net of fees performance was calculated using the highest applicable annual management fee of 1.00% applied monthly.

The annual composite dispersion presented is an asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

From September 30, 2013 to March 31, 2014, composite policy included two scenarios that require the temporary removal of any portfolio due to a client initiated significant cash inflow or outflow: 1) When the cash inflow or outflow represents from over 5% to 10% of portfolio assets and it takes longer than five trading days to reduce cash levels to less than 5%, and 2) When the cash inflow or outflow represents more than 10% of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite at the beginning of the month after the cash level in the portfolio is reduced to less than 5%. Additional information regarding the treatment of significant cash flows is available upon request.

Please note that net of fees performance for 2008 was misstated in presentation material provided to prospective clients from 3Q2016 – 4Q2020. The corrected performance is included here. Please contact SGA if you have questions.

Past performance is not indicative of future results.

Maximum fee is 0.85%; actual investment advisory fees incurred by clients may vary.
