

SGA International SMID Cap Equity

In the third quarter, the MSCI EAFE SMID Cap Net Index returned 0.02%, while volatility increased as markets discounted a more uncertain outlook for economic growth. The Delta variant caused a resurgence in COVID-19 cases and exasperated already challenging global supply chain conditions. In this environment, the International SMID Cap Equity strategy outperformed the benchmark.

The SGA Alpha Model had positive performance for the quarter among non-U.S. small and mid cap developed equities. Within the Model, the Valuation, Growth, and Sentiment categories all had positive contributions while the Quality category detracted. For the second quarter in a row the best performing factor was SGA's Fundamental Growth Consistency factor. Weaker performance in the Quality category was driven by underperformance of SGA's External Financing, F-Score, and Earnings Surprise factors.

From a sector perspective, outperformance was driven by stock selection in Real Estate, Materials, and Consumer Staples, partially offset by selection in Industrials. In Industrials, Netherlands-based lighting company Signify underperformed as earnings and guidance were below estimates, driven by supply chain constraints and subdued demand. In Consumer Staples, Japanese food and auto parts retailer G-7 Holdings was a contributor. Within Real Estate, German residential property owner LEG Immobilien reported strong results, including a decline in vacancies and higher average rent. In Materials, three Japanese chemicals companies drove outperformance: Nippon Sanso, Nissan Chemical, and Fujimi.

From a country standpoint, stock selection was positive in the U.K. and Japan, partially offset by negative selection in Australia and Switzerland. In Switzerland, computer peripherals maker Logitech detracted, as pandemic-related demand tailwinds appear to be fading. In Australia, medical equipment supplier Ansell underperformed on concerns that increased glove making capacity could alleviate tight supply. In Japan, IT services firm BayCurrent Consulting continued its positive fundamental and stock momentum as Japanese firms rapidly enhance their IT capabilities. In the U.K., antivirus software maker Avast gained, and is no longer owned in SGA portfolios, after the company confirmed it is in advanced talks to be acquired.

*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA International SMID Cap Equity representative account as of the date noted. These holdings, sectors, country, and regional weights are subject to change without notice. Individual account data may vary. This information is supplemental to the Annual Disclosure Presentation.

The MSCI EAFE SMID Cap Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of small and mid cap securities in the developed markets excluding the U.S. and Canada. The MSCI EAFE SMID Cap Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

*Performance represents a non-annualized partial period return beginning on September 30, 2006.

**Beginning January 1, 2017, pure gross returns are shown as supplemental information for bundled fee accounts and are stated gross of all fees and transaction costs.

***The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available

SGA International SMID Cap Equity Composite includes all discretionary, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international small and mid cap securities. The minimum account size for this composite is \$100 thousand. For comparison purposes, the composite is compared to the MSCI EAFE SMID Net Index. The International SMID Cap Equity Composite was created September 30, 2006. Prior to December 31, 2016, the International SMID Cap Equity Composite was known as the International Small-Mid Cap Core Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through June 30, 2020.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The International SMID Cap Equity Composite has been examined for the periods October 1, 2006 through June 30, 2020. The verification and performance examination reports are available upon request.

SGA is an independently registered investment advisor. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI EAFE SMID Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fees performance was calculated using the highest applicable annual management fee of 0.90% applied monthly effective October 1, 2017. Prior to October 1, 2017, net of fees performance was calculated using the highest applicable annual management fee of 1.50% applied monthly. Bundled fee (or wrap fee) accounts are included in the composite, and those accounts pay a fee based on a percentage of assets under management, which besides brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial services. From September 30, 2006 through December 31, 2016, gross and net returns have been reduced by the fees for these services. Beginning January 1, 2017, pure gross returns are shown as supplemental information for bundled fee accounts and are stated gross of all fees and transaction costs.

The annual composite dispersion presented is an asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

From September 30, 2013 to March 31, 2014, composite policy included two scenarios that require the temporary removal of any portfolio due to a client initiated significant cash inflow or outflow: 1) When the cash inflow or outflow represents from over 5% to 10% of portfolio assets and it takes longer than five trading days to reduce cash levels to less than 5%, and 2) When the cash inflow or outflow represents more than 10% of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite at the beginning of the month after the cash level in the portfolio is reduced to less than 5%. Beginning July 1, 2019, the composite policy requires the temporary removal of any portfolio due to a client-initiated significant cash inflow or outflow, excluding securities received or delivered in kind when the cash inflow or outflow represented 10% or greater of the portfolio assets. Additional information regarding the treatment of significant cash flows is available upon request.

Past performance is not indicative of future results.

Maximum fee is 0.90%; actual investment advisory fees incurred by clients may vary.
