

Global stocks again delivered negative returns in the second quarter, with investors taking risk off the table, as tighter financial conditions, persistently high inflation, and concerns of an economic slowdown weighed on market sentiment. International stocks, as measured by the MSCI EAFE Net Index, returned -14.51% in the second quarter, and in this environment, the International Equity ADR strategy underperformed the benchmark.

The SGA Alpha Model had negative performance for the quarter among non-U.S. large cap developed equities. Within the Model, the underperformance was driven by the Growth and Sentiment categories. These negative contributions were partially offset by strong performance from the Valuation category where SGA's Residual Income Model was the top performing factor. The Quality category had a roughly flat contribution during the quarter.

Sector returns, while broadly negative, diverged in the MSCI EAFE Index, with lower returns in sectors with increased sensitivity to rising interest rates, inflation, and lower growth expectations. The worst performing sector, Information Technology, was a sector with positive stock selection offset by negative selection in Health Care and Consumer Discretionary. Positive selection in Information Technology was driven by the portfolio's positioning in companies positively ranked by SGA's Quality factors, including Nice and Edenred, and mostly avoiding the reversal of expensive, long duration companies. In Consumer Discretionary, Pandora and ZOZO underperformed while in Health Care, Getinge was hurt by component shortages.

Underperformance was driven by negative stock selection in Japan and the U.K. and a modest allocation to South Korea. In Japan, Hoya corrected amidst a sell-off in semiconductor-related stocks. In the U.K., top portfolio contributors GSK and Barclays were offset by not holding AstraZeneca. Capital markets stocks underperformed the overall Financials sector return with U.K.-based 3i Group driving negative selection. In South Korea, banks Woori Financial and KB Financial underperformed. Stock selection was positive in the Netherlands and Israel. Netherlands-based Wolters Kluwer beat earnings expectations and raised guidance, and Israeli software firm Nice communicated double-digit revenue growth through 2026.

## Ten Calendar Years – Annual Composite Performance

\*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA International ADR Equity representative account as of the date noted. These holdings, sectors, country, and regional weights are subject to change without notice. Individual account data may vary. This information is supplemental to the GIPS® Report.

The MSCI EAFE (Europe, Australasia, Far East) Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. The MSCI EAFE Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

\*Pure gross returns are shown as supplemental information and for bundled fee accounts are stated gross of all fees and transaction costs.

\*\*The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

SGA International ADR Equity Composite includes all discretionary, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international large cap ADRs. The minimum account size for this composite is \$100 thousand. Key material risks include foreign company, currency, political, and economic events unique to a country or region that may affect those markets and their issuers. Prior to December 31, 2016, accounts in the composite held at least 75 securities. As of January 1, 2017, minimum number of securities is no longer required for accounts to be included in the composite. Beginning January 1, 2017, accounts in this composite may contain client imposed investment restrictions. For comparison purposes, the composite is compared to the MSCI EAFE Net Index, which includes large and mid-cap companies in developed market countries, excluding the U.S. and Canada. The International ADR Equity Composite was created on December 1, 2018 with a performance inception date of June 30, 2006. Prior to December 31, 2016, the International ADR Equity Composite was known as the International Large Cap Core ADR Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through December 31, 2020. The verification report(s) is/are available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

SGA is an independently registered investment advisor. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI EAFE Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. This composite consists of both bundled fee (or wrap fee) and non-bundled fee accounts. Between July 1, 2006 and August 31, 2007, the composite included only non-bundled fee accounts. From December 1, 2009 through December 31, 2013, 100% of the composite consisted of bundled fee (or wrap fee) accounts. For bundled fee accounts, these accounts pay a fee based on a percentage of assets under management, which besides brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial services. Returns are presented gross and net of fees and include the reinvestment of all income. Gross returns are shown as supplemental information and for bundled fee accounts are stated gross of all fees and transaction costs; net returns are reduced by management fees and transaction costs. Beginning January 1, 2017, less than 1% of the composite consisted of non-fee paying accounts. Composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.75% applied monthly effective October 1, 2017. Prior to October 1, 2017, composite net of fees performance was calculated using the maximum annual management fee of 0.95% applied monthly effective September 1, 2007. Prior to September 1, 2007, net of fees performance was calculated using the highest applicable annual management fee of 0.50% applied monthly. Please note that the maximum annual management fee for the respective period may differ from the actual investment advisory fees incurred by clients.

The annual composite dispersion presented is a gross of fees asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Factsheet — June 30, 2022

## SGA International ADR Equity

---

Past performance is not indicative of future results.

Maximum annual management fee is 0.75%; actual investment advisory fees incurred by clients may vary.

Please note: Previous versions of this product sheet contained related performance for periods November 30, 2005 to June 30, 2006. Performance shown prior to June 30, 2006 represents the International Equity Composite, which was a similar strategy to the International ADR Equity Composite but utilizes ordinary foreign shares instead of ADRs. The revised figures are included here. Additionally, all periods presented prior to December 1, 2018 include bundled fee portfolios. On December 1, 2018, the bundled fee portfolios were removed from this composite to the International ADR Wrap Equity composite.

Please contact SGA if you have questions.
