

# SGA International All Cap Equity

Global stocks rallied in Q4 following encouraging economic reports that persistently high inflation may have peaked, paving the way toward fewer interest rate hikes, while relaxed COVID rules from China further supported equities. In this environment, international stocks, as measured by the MSCI World ex USA IMI Net Index, returned 16.04% and the International All Cap Equity strategy underperformed the benchmark.

The SGA Alpha Model had modestly negative performance for the quarter among non-U.S. developed equities. Within the Model, both Growth and Sentiment detracted. Sentiment performed particularly poorly in November as momentum reversed when markets moved sharply on better-than-expected inflation numbers. Valuation performed well, offsetting some of the negative contributions, while Quality had a roughly neutral impact.

In terms of sector, negative stock selection, primarily within Utilities and Financials, contributed to underperformance. In Financials, an underweight to European and Japanese banks, which rallied, in favor of Israeli Bank Leumi and Bermuda-based NT Butterfield, drove the poor selection. Canadian utilities Northland Power and Brookfield Infrastructure detracted in the sector. Consumer Discretionary was an area of positive selection as several European holdings rallied after detracting earlier in the year: café chain Greggs, jewelry retailer Pandora, and discount retailer Europris. Selection was also positive in Materials, top contributors included French glass container maker Verallia and Australian miner Rio Tinto.

From a country perspective, both country allocation and stock selection detracted. The negative allocation resulted mostly from a modest overweight to Israel, the worst performing country in the benchmark. Selection was positive in Australia, offset by weak selection in France and Hong Kong. In Hong Kong, meat producer WH Group was impacted by lockdowns in China and normalization of margins from historically high levels. In France, a combination of not owning TotalEnergies, which outperformed with other integrated oil companies, and a position in L'Oréal, which lagged its peers, drove weak selection. Strong selection in Australia was driven by Rio Tinto and Perseus Mining, which benefitted as their respective commodities, iron ore and gold, rallied.

## Inception to Date—Annualized Composite Performance

	QTD	YTD	1 Year	3 Year	5 Year	7 Year	10 Year	ITD (04/30/2008)
<b>International All Cap Equity (Gross) %</b>	15.30	-16.45	-16.45	1.96	1.68	5.27	6.71	4.43
<b>International All Cap Equity (Net)* %</b>	15.09	-17.11	-17.11	1.12	0.83	4.35	5.74	3.45
<b>MSCI World ex USA IMI Index (Net) %</b>	16.04	-15.26	-15.26	1.05	1.59	4.86	4.73	2.36
<b>SGA Relative (Gross) %</b>	-0.96	-1.85	-1.85	0.07	-0.76	-0.52	1.01	1.09

\*Net of fees performance was calculated using the highest applicable annual management fee of 0.75% applied monthly effective July 1, 2022. Prior to July 1, 2022, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.85% applied monthly. Prior to October 1, 2017, net of fees performance was calculated using the highest applicable annual management fee of 1.00% applied monthly; actual investment advisory fees incurred by clients may vary.

A limited performance period of ten calendar years is shown, the inception of the strategy was April 30, 2008.

\*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA International All Cap Equity representative account as of the date noted. These holdings, sectors, country, and regional weights are subject to change without notice. Individual account data may vary. This information is supplemental to the GIPS® Report.

The MSCI World ex USA IMI Index (Net) is free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. The MSCI World ex USA IMI Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

\*Performance represents a non-annualized partial period return beginning on April 30, 2008.

\*\*The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

SGA International All Cap Equity Composite includes all discretionary, fee paying, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international all cap securities. The minimum account size for this composite is \$100 thousand. Key material risks include foreign company, currency, political, and economic events unique to a country or region that may affect those markets and their issuers. Moreover, investing in small- and mid-capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. Beginning January 1, 2017, accounts in this composite may contain client imposed investment restrictions. For comparison purposes, the composite is compared to the MSCI World Ex-U.S. IMI Net Index, which includes large, mid and small-cap companies in developed markets, excluding the U.S. The International All Cap Equity Composite was created and inception on April 30, 2008. Prior to December 31, 2016, the International All Cap Equity Composite was known as the International All Cap Core MSCI World ex-U.S. IMI Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through December 31, 2021. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

SGA is an independently registered investment advisor. Registration does not imply any level of skill or training. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI World ex-U.S. IMI Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.75% applied monthly effective July 1, 2022. Prior to July 1, 2022, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.85% applied monthly. Prior to October 1, 2017, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 1.00% applied monthly. Please note that the maximum annual management fee for the respective period may differ from the actual investment advisory fees incurred by clients.

The annual composite dispersion presented is a gross of fees asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

From September 30, 2013 to March 31, 2014, composite policy included two scenarios that require the temporary removal of any portfolio due to a client initiated significant cash inflow or outflow: 1) When the cash inflow or outflow represents from over 5% to 10% of portfolio assets and it takes longer than five trading days to reduce cash levels to less than 5%, and 2) When the cash inflow or outflow represents more than 10% of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite at the beginning of the month after the cash level in the portfolio is reduced to less than 5%. Additional information regarding the treatment of significant cash flows is available upon request.

Factsheet — December 31, 2022

# SGA International All Cap Equity
