

Global equities moderately advanced for the third consecutive quarter with positive gains masking a volatile quarter. Investors focused on the U.S. debt ceiling debate while simultaneously recalibrating interest rate expectations amid improvements in inflation. International stocks, as measured by the MSCI EAFE Net Index, returned 2.95%, and the International Equity ADR strategy outperformed the benchmark.

The SGA Alpha Model had positive performance for the quarter among non-U.S. large cap developed equities. The Model performed well in May and June, more than overcoming April. Overall, Valuation was the primary contributor, led by SGA's Residual Income Model factor, the top performing factor during the quarter. Sentiment was also slightly positive, while Growth and Quality had modestly negative contributions. The Model benefitted from positive interaction between categories. In particular, the other three categories all performed better when conditioned on Quality than on a standalone basis.

Positive stock selection in Health Care and Financials drove the outperformance. In Financials, contributors were 3i Group, which showcased impressive portfolio results, and ORIX Corp, which benefited from Japan's domestic reopening. Drug maker Novartis gained on strong earnings and positive trial results while an underweight to bottom performing Real Estate added to relative performance. Selection in Consumer Staples was also notable, led by Jeronimo Martins which reported robust earnings as margins surprised to the upside. Weak selection in Consumer Discretionary tempered the positive results, with Pandora and ZOZO lagging due to consumer slowdown concerns. IT was an area where the Alpha Model underperformed, with detractors including Israeli firms Wix.com and Nice.

Positive stock selection in the U.K. and Japan drove the outperformance. SGA's Value and Quality factors favored Marubeni and Mitsui, Japanese trading companies that beat earnings expectations and announced increasing shareholder returns. Renesas, ORIX Corp, and 3i Group also contributed. An underweight allocation to bottom performing countries Hong Kong, Finland, and Belgium added to relative performance. Israel, the Netherlands, Austria, and Norway tempered positive selection with Andritz and Norsk Hydro underperforming. In the Netherlands, despite management proactively addressing A.I. concerns and reporting strong earnings, Universal Music Group detracted.

*Returns for periods of less than one year are not annualized.

**Net of fees performance was calculated using the highest applicable annual management fee of 0.70% applied monthly effective July 1, 2022. Prior to July 1, 2022, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.75% applied monthly. Prior to October 1, 2017, net of fees performance was calculated using the highest applicable annual management fee of 0.95% applied monthly effective September 1, 2007. Prior to September 1, 2007, net of fees performance was calculated using the highest applicable annual management fee of 0.50% applied monthly; actual investment advisory fees incurred by clients may vary. Benchmark returns are net of foreign withholding taxes.

Please see the GIPS® Report for additional information. Past performance is not indicative of future results.

*The weights are based on a representative account in the strategy as of the date noted. These weights are subject to change at any time without notice. Individual account data may vary. ETFs, if held, are generally used for cash management purposes and/or to gain exposure in markets that are unavailable to the account, and are not included in the referenced data.

The MSCI EAFE (Europe, Australasia, Far East) Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. The MSCI EAFE Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

*Pure gross returns are shown as supplemental information and for bundled fee accounts are stated gross of all fees and transaction costs.

**The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

SGA International ADR Equity Composite includes all discretionary, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international large cap ADRs. The minimum account size for this composite is \$100 thousand. Key material risks include foreign company, currency, political, and economic events unique to a country or region that may affect those markets and their issuers. Prior to December 31, 2016, accounts in the composite held at least 75 securities. As of January 1, 2017, minimum number of securities is no longer required for accounts to be included in the composite. Beginning January 1, 2017, accounts in this composite may contain client-imposed investment restrictions. For comparison purposes, the composite is compared to the MSCI EAFE Net Index, which includes large and mid-cap companies in developed market countries, excluding the U.S. and Canada. The International ADR Equity Composite was created on December 1, 2018 with a performance inception date of June 30, 2006. Prior to December 31, 2016, the International ADR Equity Composite was known as the International Large Cap Core ADR Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through December 31, 2022. The verification report(s) is/are available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

SGA is an independently registered investment advisor. Registration does not imply any level of skill or training. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI EAFE Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. This composite consists of both bundled fee (or wrap fee) and non-bundled fee accounts. Between July 1, 2006 and August 31, 2007, the composite included only non-bundled fee accounts. From December 1, 2009 through December 31, 2013, 100% of the composite consisted of bundled fee (or wrap fee) accounts. For bundled fee accounts, these accounts pay a fee based on a percentage of assets under management, which besides brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial services. Returns are presented gross and net of fees and include the reinvestment of all income. Gross returns are shown as supplemental information and for bundled fee accounts are stated gross of all fees and transaction costs; net returns are reduced by management fees and transaction costs. Composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.70% applied monthly effective July 1, 2022. Prior to July 1, 2022, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.75% applied monthly. Prior to October 1, 2017, composite net of fees performance was calculated using the maximum annual management fee of 0.95% applied monthly effective September 1, 2007. Prior to September 1, 2007, net of fees performance was calculated using the highest applicable annual management fee of 0.50% applied monthly. Please note that the maximum annual management fee for the respective period may differ from the actual investment advisory fees incurred by clients.

The annual composite dispersion presented is a gross of fees asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Factsheet — June 30, 2023

SGA International ADR Equity

Past performance is not indicative of future results.

Maximum annual management fee is 0.70%; actual investment advisory fees incurred by clients may vary.

Please note: Previous versions of this product sheet contained related performance for periods November 30, 2005 to June 30, 2006. Performance shown prior to June 30, 2006 represents the International Equity Composite, which was a similar strategy to the International ADR Equity Composite but utilizes ordinary foreign shares instead of ADRs. The revised figures are included here. Additionally, all periods presented prior to December 1, 2018 include bundled fee portfolios. On December 1, 2018, the bundled fee portfolios were removed from this composite to the International ADR Wrap Equity composite.

Please contact SGA if you have questions.
