

# SGA International All Cap Equity

Global equities moderately advanced for the third consecutive quarter with positive gains masking a volatile trading environment. Investors focused on the U.S. debt ceiling debate while simultaneously recalibrating interest rate expectations amid moderating inflation readings. International stocks, as measured by the MSCI World ex USA IMI Net Index, returned 2.67% and the International All Cap Equity strategy underperformed the benchmark.

The SGA Alpha Model had negative performance for the quarter among non-U.S. developed equities. Within the Model, the Valuation, Quality, and Growth categories all detracted, while the Sentiment category had a roughly neutral impact. The underperformance was partially offset by positive interaction between categories. In particular, the other three categories all performed better when conditioned on Quality than on a standalone basis.

The underperformance was driven by stock selection within sectors, primarily in Industrials, Utilities, and Consumer Discretionary. In Industrials, industrial machinery firm Andritz was the top detractor, giving back some returns after strong performance the past year. In Utilities, renewable energy producer Northland Power was impacted by falling power prices. Underperformance in Consumer Discretionary mostly resulted from poor selection in Japan, where online retailer Zozo, discount store operator Seria, and gaming machine maker Sankyo declined. The negative selection was partially offset by strong selection in Communication Services where Hellenic Telecommunications and video game company Nintendo were top contributors.

Stock selection within countries drove underperformance. Selection was weakest in Austria and Italy, partially offset by strong selection in Singapore and the U.K. In Austria, previously mentioned Andritz detracted. Detractors in Italy included refiner SARAS, which has had its margins pressured by oil and refined products commodity price spreads, and bank Fineco which was impacted by weaker interest income. The Alpha Model performed well in Singapore, where the top contributor Yangzijiang Shipbuilding had robust new orders. In the U.K., much of the outperformance was driven by allocation to Financials, the top performing sector in the country, including top contributor private equity manager 3i Group.

## Inception to Date – Composite Performance

	Qtr*	YTD*	1 Yr	3 Yrs	5 Yrs	7 Yrs	10 Yrs	Since Inception 04/30/2008

\*Returns for periods of less than one year are not annualized.

\*\*Net of fees performance was calculated using the highest applicable annual management fee of 0.75% applied monthly effective July 1, 2022. Prior to July 1, 2022, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.85% applied monthly. Prior to October 1, 2017, net of fees performance was calculated using the highest applicable annual management fee of 1.00% applied monthly; actual investment advisory fees incurred by clients may vary. Benchmark returns are net of foreign withholding taxes.

Please see the GIPS® Report for additional information. Past performance is not indicative of future results.

\*The weights are based on a representative account in the strategy as of the date noted. These weights are subject to change at any time without notice. Individual account data may vary. ETFs, if held, are generally used for cash management purposes and/or to gain exposure in markets that are unavailable to the account, and are not included in the referenced data.

The MSCI World ex USA IMI Index (Net) is free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. The MSCI World ex USA IMI Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

\*Performance represents a non-annualized partial period return beginning on April 30, 2008.

\*\*The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

SGA International All Cap Equity Composite includes all discretionary, fee paying, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international all cap securities. The minimum account size for this composite is \$100 thousand. Key material risks include foreign company, currency, political, and economic events unique to a country or region that may affect those markets and their issuers. Moreover, investing in small- and mid-capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. Beginning January 1, 2017, accounts in this composite may contain client imposed investment restrictions. For comparison purposes, the composite is compared to the MSCI World Ex-U.S. IMI Net Index, which includes large, mid and small-cap companies in developed markets, excluding the U.S. The International All Cap Equity Composite was created and inception on April 30, 2008. Prior to December 31, 2016, the International All Cap Equity Composite was known as the International All Cap Core MSCI World ex-U.S. IMI Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through December 31, 2022. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

SGA is an independently registered investment advisor. Registration does not imply any level of skill or training. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI World ex-U.S. IMI Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.75% applied monthly effective July 1, 2022. Prior to July 1, 2022, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.85% applied monthly. Prior to October 1, 2017, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 1.00% applied monthly. Please note that the maximum annual management fee for the respective period may differ from the actual investment advisory fees incurred by clients.

The annual composite dispersion presented is a gross of fees asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

From September 30, 2013 to March 31, 2014, composite policy included two scenarios that require the temporary removal of any portfolio due to a client initiated significant cash inflow or outflow: 1) When the cash inflow or outflow represents from over 5% to 10% of portfolio assets and it takes longer than five trading days to reduce cash levels to less than 5%, and 2) When the cash inflow or outflow represents more than 10% of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite at the beginning of the month after the cash level in the portfolio is reduced to less than 5%. Additional information regarding the treatment of significant cash flows is available upon request.

Factsheet — June 30, 2023

# SGA International All Cap Equity
