

# SGA International World ex-U.S. Equity

Global equities moderately advanced for the third consecutive quarter with positive gains masking a volatile quarter. Investors focused on the U.S. debt ceiling debate while simultaneously recalibrating interest rate expectations amid improvements in inflation. International stocks, as measured by the MSCI World ex USA Net Index, returned 3.03%, and the International World ex-U.S. Equity strategy modestly outperformed the benchmark.

The SGA Alpha Model had positive performance for the quarter among non-U.S. large cap developed equities. The Model performed well in May and June, more than overcoming April. Valuation was the primary contributor, led by SGA's Residual Income Model factor. Sentiment was also slightly positive, while Growth and Quality had modestly negative contributions. The Model benefitted from positive interaction between categories. In particular, the other three categories all performed better when conditioned on Quality than on a standalone basis.

Positive stock selection in Health Care and Financials drove outperformance. In Financials, contributors included 3i Group, Fairfax Financial, and HSBC Holdings, which showcased strength in its Hong Kong wealth business. In Health Care, Novartis reported strong trial results while ICON reaffirmed earnings guidance. Materials had strong selection including Heidelberg Materials and Nitto Denko which rose following well-received business growth initiatives. Weak selection in Consumer Discretionary tempered the positive results, with Pandora and Zozo lagging due to consumer slowdown concerns. Information Technology was an area where the Alpha Model underperformed, with detractors including Israeli firms Nice and Check Point Software.

Strong stock selection in Canada, the U.K., and Japan drove outperformance. SGA's Value and Quality factors favored Marubeni and Mitsui, Japanese trading companies that beat earnings expectations and announced improved shareholder returns. Nintendo, Renesas, and Fairfax Financial also contributed. In the U.K., 3i Group reported robust earnings while HSBC Holdings also advanced. A modest underweight to bottom performing countries Belgium, Finland, and Hong Kong added to relative performance. Israel, Austria, and the Netherlands tempered positive selection with Andritz underperforming. In the Netherlands, despite management proactively addressing A.I. concerns and reporting strong earnings, Universal Music Group detracted.

## Inception to Date – Composite Performance

	Qtr*	YTD*	1 Yr	3 Yrs	5 Yrs	7 Yrs	10 Yrs	Since Inception 12/31/2013
<b>International World ex-U.S. Equity (Gross) %</b>	3.51	13.25	18.62	9.09	3.63	6.28		4.80

\*Returns for periods of less than one year are not annualized.

\*\*Net of fees performance was calculated using the highest applicable annual management fee of 0.60% applied monthly effective July 1, 2022. Prior to July 1, 2022, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 1.00% applied monthly; actual investment advisory fees incurred by clients may vary. Benchmark returns are net of foreign withholding taxes. Please see the GIPS® Report for additional information. Past performance is not indicative of future results.

\*The weights are based on a representative account in the strategy as of the date noted. These weights are subject to change at any time without notice. Individual account data may vary. ETFs, if held, are generally used for cash management purposes and/or to gain exposure in markets that are unavailable to the account, and are not included in the referenced data.

The MSCI World ex USA Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. The MSCI World ex USA Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

SGA International World ex-U.S. Customized Equity Composite includes all discretionary, investment restricted, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international large cap securities. The minimum account size for this composite is \$100 thousand. Key material risks include foreign company, currency, political, and economic events unique to a country or region that may affect those markets and their issuers. For comparison purposes, the composite is compared to the MSCI World ex USA Net Index, which consists of large and mid-cap companies in developed market countries excluding the U.S. The International World ex-U.S. Customized Composite was created and inceptioned on December 31, 2013. Prior to December 31, 2016, the International World ex-U.S. Customized Equity Composite was known as the International Large Cap Core Equity MSCI World Ex-U.S. Customized Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through December 31, 2022. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

SGA is an independently registered investment advisor. Registration does not imply any level of skill or training. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI World ex USA Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 0.60% applied monthly effective July 1, 2022. Prior to July 1, 2022, composite net of fees performance was calculated by reducing the gross of fees return by the maximum annual management fee of 1.00% applied monthly. Please note that the maximum annual management fee for the respective period may differ from the actual investment advisory fees incurred by clients.

The annual composite dispersion presented is a gross of fees asset-weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Past performance is not indicative of future results.

Maximum annual management fee is 0.60%; actual investment advisory fees incurred by clients may vary.
