

SGA International ACWI ex-U.S. Equity

Global equities edged higher in the quarter, as escalating Middle East tensions drove oil prices higher, renewing inflation concerns and expectations for further rate hikes, while a reversal in AI-related technology stocks tempered gains. International stocks, as measured by the MSCI ACWI ex USA Net Index, returned 0.48% in the third quarter. In this environment, the ACWI ex-U.S. Equity strategy underperformed the benchmark.

The SGA Alpha Model had positive performance for the quarter among non-U.S. large cap equities. Within the Model, all four categories contributed positively; however, in contrast to prior quarters, the interaction between categories detracted, partially offsetting these contributions as the standalone categories outperformed the Model as a whole. The Valuation category performed best, led by strong contributions from both of its underlying factors, followed by the Quality category, while Growth and Sentiment made more modest contributions.

Robust selection in Energy, Information Technology, and Financials, partially offset by weak selection in Health Care, Industrials, and Communication Services, drove in-line performance. Oil majors Suncor Energy, Var Energi, and Cenovus rose as oil prices increased, while in IT, Otsuka Corp. raised guidance and MediaTek outperformed peer semiconductor companies. In Financials, BBVA and Standard Chartered reported strong earnings and capital returns. In Health Care, UCB fell as softer Bimzelx sales overshadowed raised guidance, and AstraZeneca declined on disappointing clinical trial results and reports of merger talks with Bristol Myers Squibb. Eiffage lowered its toll road outlook in Industrials, while Brazilian telecoms Telefonica Brasil and TIM fell amid intensifying competition.

Strong selection in Canada and China, along with an underweight to India, a lagging market, drove in-line performance. Canadian oil producers Suncor Energy and Cenovus rose alongside oil prices due to the conflict in the Strait of Hormuz, while China Gold International advanced on higher earnings and an expansion plan for its Jiamia mine. Weak selection in Germany, Japan, and the U.K. tempered gains. HOCHTIEF fell in Germany despite raising guidance on data center demand, while Siemens Energy lagged amid concerns over the pace of AI investment. Japanese holdings Murata Manufacturing and Sumitomo Electric declined with a pullback in AI-related stocks. In the U.K., Games Workshop lagged amid a weakening consumer outlook on rising inflation, while Imperial Brands fell on market share losses.

Inception to Date – Composite Performance

	Qtr*	YTD*	1 Yr	3 Yrs	5 Yrs	7 Yrs	10 Yrs	Since Inception 06/30/2015

*The weights are based on a representative account in the strategy as of the date noted. These weights are subject to change at any time without notice. Individual account data may vary. ETFs, if held, are generally used for cash management purposes and/or to gain exposure in markets that are unavailable to the account, and are not included in the referenced data.

The MSCI ACWI ex USA Index (Net) is free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. The MSCI ACWI ex USA Index (Net) returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

*Performance represents a non-annualized partial period return beginning on June 30, 2015.

**The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

International ACWI ex-U.S. Equity Composite includes all discretionary, investment restricted, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international large cap securities. The minimum account size for this composite is \$100 thousand. Key material risks include foreign company, currency, political, and economic events unique to a country or region that may affect those markets and their issuers. Moreover, investing in emerging markets securities are subject to heightened risks as these types of securities may have governments that are less stable, markets that are less liquid and economies that are less developed. For comparison purposes, the composite is compared to MSCI ACWI ex USA Net Index, which includes large and mid-cap companies outside the U.S. in developed and emerging market countries. The International ACWI ex-U.S. Equity Composite was created and inceptioned on June 30, 2015. Prior to December 31, 2016, the International ACWI ex-U.S. Equity Composite was known as the International Large Cap Core Equity MSCI All Country World ex-U.S. Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through December 31, 2025.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The International ACWI ex-U.S. Equity Composite has had a performance examination for the periods January 1, 2018 through December 31, 2025. The verification and performance examination reports are available upon request.

SGA is an independently registered investment advisor. Registration does not imply any level of skill or training. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends and interest income. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI ACWI ex USA Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Composite net of fees performance was calculated by reducing the gross of fees return by the maximum model annual management fee of 0.65% applied monthly. Please note that the maximum model annual management fee for the respective period may differ from the actual investment advisory fees incurred by clients.

The annual composite dispersion presented is a gross of fees asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

From July 1, 2019 through January 31, 2024, the composite policy required the temporary removal of any portfolio due to a client-initiated significant cash inflow or outflow, excluding securities received or delivered in kind when the cash inflow or outflow represented 10% or greater of the portfolio assets. Additional information regarding the treatment of significant cash flows is available upon request.

Past performance is not indicative of future results.

Maximum annual management fee is 0.65%; actual investment advisory fees incurred by clients may vary.
